>> Good Afternoon Pat - I am currently working on the Phase III Plan and have reviewed comments received to date. Some of the comments reference including Divisions that have been previously approved by SCAT as having met endpoints. Specifically SB-Div L, SB-Div M, SB-Div N, SB-Div O, SB-Div P are included in the Phase III Plan. The document states that "Segments that have already met phase 2 endpoints will be sampled one time. If possible, hard substrates including bedrock, boulders and cobbles will be sampled. Field splits will be made available to OSPR, USCG and RP representatives. Samples will be sent and analyzed at the separate OSPR, USCG and RP labs. If the samples come back as not consistent with Refugio Oil, they will be taken out of the phase 3 categories. If the samples come back as consistent with Refugio Oil, the segments will be cleaned. Another SIR will be completed and submitted to further confirm the status of the segment."
>>
>>
>>
>> Specifically, I am requesting UC approval to provide further guidance to the overall oil sampling assessment as follows:
>>
>> During the Oil Survey Assessment to be conducted this week, can the crews in SB-Div L, SB-Div M, SB-Div N, SB-Div O, SB-Div P be directed by the EUL to also collect samples as referenced above?
>>
>>
>>
>> It seems as this would be efficient. The Phase III document would then reference adding segments to Phase III in the event that the sampling indicates that oil in these Divisions is 901 oil.
>>
>>
>>
>> I am available to discuss further if needed and happy to answer any questions. Thank you in advance for your time.
